

1. Check Positive number.

```

public class PositiveNumber {
    public static void main(String[] args)
    {
        int num = 10;
        if (num > 0) {
            System.out.println("Number is
            Positive");
        }
    }
}

```

2. Check Number Negative

```

public class NegativeNumber {
    public static void main(String[] args)
    {
        int num = -2;
        if (num < 0) {
            System.out.println("Number is
            Negative");
        }
    }
}

```

3. Check Odd AND Even Number

```

public class EvenOdd {
    public static void main(String[] args) {
        int num = 5;
        if (num % 2 == 0) {
            System.out.println("Number is Even");
        }
        else {
            System.out.println("No. is Odd");
        }
    }
}

```

⇒ odd - 5

4 * Display Good Morning

```

→ public class GoodMorning {
    public static void main (String[] args) {
        int time = 10;
        if (time > 5 && time < 12)
        {
            System.out.println("Good morning")
        }
        else {
            System.out.println("No msg")
        }
    }
}

```

5 * Area of Square = Side x Side

```

→ public class Square {
    public static void main (String[] args) {
        int side = 10;
        int area = side * side;
        System.out.println(area)
    }
}

```

6 * Area of Rectangle - Length x width

```

→ public class Rectangle {
    public static void main (String[] args) {
        int length = 10;
        int width = 5;
        int area = length * width;
    }
}

```

System.out.println (Area);

Date: / /

Find Largest 3 Number

```
public class Largest Number {  
    public static void main (String[] args)
```

```
{  
    int num1 = 5;
```

```
    int num2 = 15;
```

```
    int num3 = 10;
```

```
    if (num1 > num2 && num1 > num3)
```

```
{  
        System.out.println ("num 1 is  
                               (largest", num1)
```

```
    }  
    else if (num2 > num1 && num2 > num3)
```

```
{  
        System.out.println ("num 2  
                               is largest", num2)
```

```
    }  
    else {
```

```
        System.out.println ("num 3  
                               is largest", num3)
```

```
    }  
}
```

```
{ }  
}
```
